SUMMARY

I'm a React Native developer with 4 years building production iOS and Android apps — real-time systems, payments, and on-device ML included. I care most about shipping reliable, well-architected code, and I lean on AI tooling like Claude and Cursor to move faster without cutting corners.

TECHNICAL SKILLS

Core: JavaScript (ES6+), TypeScript, React Native, Redux/Redux Toolkit, Context API

Integrations & APIs: Firebase (Auth, FCM), Notifee, Stripe, Checkr, Intercom, Agora, Socket.io, Branch.io, ML Kit, RN Keychain/Keystore

Maps & Location: Google Maps, Apple Maps, Waze, Google Places Autocomplete

Testing & Tooling: Jest, Detox, React Native Debugger, Git, CI/CD, Expo

AI-Assisted Development: ChatGPT, Claude, Claude Code, Cursor — for rapid prototyping, debugging, and code review

Practices: Agile/Scrum, performance profiling & optimization, cross-functional collaboration

EXPERIENCE

Software Engineer – React Native *Appinventiv Technologies*

Jul 2023 – Present | Noida, UP

- Led development of high-performance cross-platform apps in React Native, architecting state management with Redux and Context API for reliability at scale.
- Built dynamic multi-page forms, reusable UI components, and interactive data visualizations, cutting new-feature development time across the team.
- Secured authentication via device keychain token storage and Google/Apple auth; shipped in-app purchases, Google Mobile Ads, push/in-app notifications, and Branch.io deep linking.
- Drove Agile ceremonies (sprint planning, code reviews, stand-ups) across the full development lifecycle.

Jr. Software Engineer *Service Ninjas Pvt. Ltd.*

Jun 2022 – Jun 2023 | Delhi, India

- Built cross-platform apps using JavaScript, React Native, and Redux; debugged and optimized components for performance.
- Partnered with senior developers to implement UI features and integrate RESTful APIs.

Analyst *Capgemini*

Aug 2021 – May 2022 | Pune, MH

- Trained in Java, JavaScript, HTML/CSS, and Salesforce; earned multiple Salesforce skill badges building declarative automations (Flow, Process Builder).

PROJECTS

Ponteo | *US-based dental marketplace app / Firebase, Stripe, ML Kit, Socket.io*

10 Months

- Built phone-number-based login alongside Firebase Google/Apple sign-in and React Native Keychain/Keystore for secure token storage; added biometric auth (Face ID/Touch ID), cutting login time 50% (4s manual entry to 2s) while removing password entry as an attack surface.
- Integrated Stripe for in-app payments and Checkr for automated background verification of dental professionals.
- Replaced manual pull-to-refresh with on-device caching and Socket.io live sync, pushing data updates to the UI instantly as they occurred; added real-time chat via Agora and Intercom support.
- Integrated Google/Apple Maps, Waze, and Places Autocomplete for navigation, plus on-device ML Kit for automatic profile picture background removal.

Yeether App | *Push Notifications, Google AdMob, IAP*

Ongoing

- Built secure Google/Apple sign-in with RN Keychain token storage; integrated Google Mobile Ads and in-app purchases to expand monetization.

Loginext Dispatcher | *Redux, Data Viz, Google Maps*

6 Months

- Built multi-page forms, bar/pie/donut chart visualizations, and Google Maps clustering for analytics-driven dispatch decisions.

Rainbow Hospitals | *Custom Chat, Video, Scheduling* 4 Months

- Built in-person/virtual consultation scheduling with Agora video consultations and a period-tracking feature for preventive women’s healthcare.

EDUCATION

B.Tech, Information Technology *Noida Institute of Engineering & Technology* 2017 – 2021

CERTIFICATIONS

Anthropic AI development coursework (Claude/AI tooling) — 2026
